Designer Notes:

An impressive facade is just the beginning of the grandeur of this home. The Master Bedroom and Entry set the tone with some luxurious touches, but its layout is the winner! With its 4 Bedrooms and Snug, this home suits a variety of family types, but the Living and Entertaining Areas are certainly a feature. The lovely Kitchen has an extensive Pantry and looks out to the Outdoor covered area which can be designed to be your main living area, with big sliding doors and outdoor sitting area can be a Dining/BBQ area depending on your lifestyle. The Bathroom is spacious and with a Powder Room, your family and guests will be well catered to. If it's a quiet retreat you are after, you will enjoy the Snug which can alternatively be a quiet Sitting area or Media Room. There are many options here, which makes this home a wonderful choice.
