

You want to build a new home. And you want the experience to be simple. You're busy. We've spent a lot of time perfecting our home designs and processes to ensure they enhance every **lifestyle**. Every idea, every design feature, is blended to create this stunning home. Building is what we do best. **This is our signature.**

“ it's your,
DESTINY”

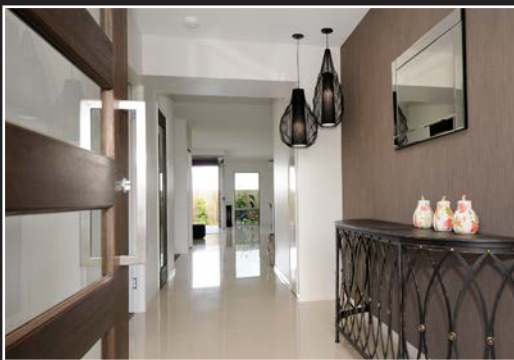

We're delighted to welcome you to "Destiny". This home design is a result of years of contemplation and a passion for our company to continue to deliver unique and beautiful home designs. The floor plan has evolved from a desire to present our past and future clients with a spectacular home to view - a contemporary design that expresses our signature building style with its luxury touches - and is yet still affordable.

We've thoughtfully considered the way families are living now. How do you encompass beautiful finishes with modern design and yet not lose the comfortable, quiet spaces that most of us crave at the end of each day? The "Destiny" is our end result.

It is impressive right from the grand proportions of the front portico and entry, as it flows past quiet, parent-designed areas to the magnificent family, living and outdoor spaces where friends and family will gather.

The "Destiny" also has a docking station near the kitchen - a space that caters to all the modern technology items we use every day, but which can be conveniently hidden behind bi-fold doors the moment the guests arrive. It's a brand new concept we're excited to bring to our extensive range of homes.

A personal favourite is the 'snug' - another unique idea created to bring some more personal space to the adults in the family. Generally we are living in our family and barbecue areas, but home builders in Toowoomba and on the Downs appreciate the luxury of more intimate spaces to warm up and relax in during our cold winter months. Curl up in the 'snug' with a book, a friend or a coffee at any time, and leave feeling rejuvenated and ready to take on the world.

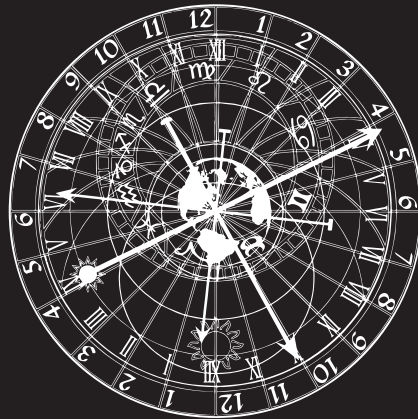

"It's our Signature..."

“...It's your Investment”

With several variations to the home you see displayed, we know we have a design to suit your needs. Alternatively we can build to your design. It is unquestionably one of the biggest investments you will make when you decide to build and we will not only invest our time with you, but our team will work with you to customise your fixtures and finishes that will ultimately ensure that you end up with a home you love.

Please enjoy our display and feel free to spend time asking the questions and getting the important and honest answers you deserve.
